

HOWLER REHAB INTERNSHIP

THE TOUCAN RESCUE RANCH

The Toucan Rescue Ranch's (TRR) mission is to rescue, rehabilitate, and release Costa Rica wildlife. TRR works with a model that focuses on conservation, education, and research to ensure a brighter tomorrow for Costa Rica wildlife.

TRR's emphasis is on the care, rehabilitation, and release of national wildlife. We receive and care for confiscated, sick, and injured animals from government agencies. The Toucan Rescue Ranch works closely with the Ministry of Environment and Energy of Costa Rica (MINAE) who brings injured and displaced wildlife to the center. TRR provides sanctuary while giving treatment and rehabilitation. Whenever possible the animal is released to their natural environment.

The Toucan Rescue Ranch is a licensed Costa Rica wildlife rescue facility, Costa Rica foundation (300667701803) and a 501(c)3 nonprofit organization (EIN: 80-0516453).

HOWLER REHAB INTERNSHIP DESCRIPTION

The Release Site focuses on the rehabilitation and care of animals that are almost ready to return back to the wild. The Howler Intern's primary responsibilities include feeding, cleaning up after, monitoring, and collecting enrichment for baby and juvenile howler monkeys. Your focus will be on monitoring these patients, observing and reporting any changes or abnormalities such as in behavior or eating habits. You will also be expected to observe howlers in the wild to see what fruits are in season that we can collect, as well as tracking and observing recently released candidates. If there are babies to feed, you will assist the clinic intern with their care. You will live in close contact with nature and wildlife, working outdoors all day to ensure that the howlers under our care have their best shot at survival in the wild. You will not only be working with monkeys. You would be also assisting with all animals received at TRR and animal's recovery in the clinic as well as pre-release enclosures, serving as backup to our Animal Care interns to help in the daily care of the rest of our animals at the release site.
